# Creating Business Value with Data and Looker

In this three-course specialization, learners explore Looker and the value of data in an organization. The learning journey includes understanding data's role in an organization's digital transformation, how a business analyst can use Looker to analyze and visualize data, and finally the skills needed to be a LookML developer who creates data experiences for self-serve exploration, analysis, and visualization by business users at their organization.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
